<div style="border: 2px solid red; padding: 5px;"> <p>February is the time to start getting Dairy Feeders or making arrangements with breeders to purchase a feeder from them. You should gauge your dairy feeder's size to your size. If you weigh 100 lbs, you don't want to take a feeder that weighs 500 to 600 lbs. You want a feeder around 350 to 450 lbs so you can control him.</p> <p>Dairy Feeders birth date: January 15th thru February 15 = 500 to 600 lbs February 15 thru March 15th = 400 to 500 lbs After March 15th = 300 to 400 lbs.</p> </div>
